

POLYSTYRENE. UNIVERSALLY POPULAR. RESOURCE EFFICIENT.

Look around you, wherever you happen to be.

Whether you are at home, in a classroom, an office, shopping or even alone in a truck or 4WD in the middle of a desert, you are sure to find plastics around you.

There are good reasons for the universal popularity of plastics, especially polystyrene which is an important and widely used plastic.

There is also concern by some groups in the community over the environmental impact of polystyrene.

However, as the facts in this booklet demonstrate, polystyrene is consumer-friendly *and* resource efficient.

Here we present the answers to some of the more common questions.
